Github:	**https://github.com/kevindweb**

WORK EXPERIENCE

PrecisionLender — Cary, NC — Summer Product Development Intern   Jun 2018 — Aug 2018
Using multiple Microsoft Azure programs, I worked on PrecisionLender's digital assistant, and allowed her deeper insight into her interactions with users by layering on additional insights from a new natural language understanding service. This allowed client responses over resources like Slack and Zendesk.

Atlas Lane — Washington, DC — Contract Software Developer   Oct 2017 — Feb 2018
Managed the workload of both a full-time student and twenty hours per week as a software developer. Utilizing JavaScript, HTML5 and CSS3 powered by ReactJS, I collaborated with corporate clients to complete project bids. Also worked on in-house applications such as workflow and scheduling tools.

Bizzoom Business Marketing — Sarasota, Fl — Software Intern   Apr 2017 — May 2018
Senior year internship with an international marketing company. using PHP and JavaScript, improved usability for an application for a physical therapy partner company to better understand the assessment of people's balance. The user interface was created, so I updated the structure to fit the data being collected.

TriaxPM — Sarasota, Fl — Front Desk, Metal and Laser working   Jul 2016 — Mar 2017
Aerospace Engineering facility that designs and produces specialized instrumentation. Responsibilities included cleaning machinery; preparing metal products for packaging; processing work orders. Skills utilized ranged from welding and metal preparation to front office administration.
